Gentlemen:

The City of Bayonne is interested in setting up a Public Radio Station on either AM or FM, under the pending low power license program. Our goal is to provide the citizens of Bayonne with emergency disaster information, as well as an information source for local government and social activities.

I have inspected the low power radio station at Monmouth Beach, New Jersey and it is perfect for their needs. However, we want to offer programming broader in scope and not limited by the "no music" regulation.

We only need enough power to broadcast over a three mile radius and we expect that it should not interfere with New York stations.

Please keep us abreast of changes in regulations regarding low power stations so that we might apply for a license as soon as possible.

Thank you for your cooperation and support in this matter.

Sincerely,

Andrew Balik
Purchasing Agent
